### PROFILE

I am an experienced front-end engineer who specializes in JavaScript debugging and optimizing the user experience. I have a passion for responsive web design, web accessibility, and cross-browser compatibility.

### SKILLS

- ES6 JavaScript
- React and Redux
- Webpack & Git
- Web Performance
- Responsive Web Design
- HTML and Liquid
- CSS, Sass & SCSS
- Node, Express, and Jekyll
- PHP & WordPress
- MySQL and MongoDB
- Docker and AWS

## EXPERIENCE

### FRONT-END TECH LEAD (VOLUNTEER)

HACK FOR LOS ANGELES | JUN 2020 - PRESENT

- Spearhead the effort to standardize elements within the Hack for LA website (cards, buttons, etc.). This includes the implementation of a design system and optimizing the user experience by enforcing web accessibility standards. ([HfLA Contributions](#))
- Collaborate with other developers, UX designers, and project managers in a small, agile team maintaining a responsive and cross-browser-compatible Jekyll-based website ([HfLA website](#)).
- Facilitate the weekly stand-up and lead the repo merge team while managing the front-end GitHub project board. ([HfLA Project Board](#))

### SOFTWARE ENGINEERING TECHNICAL LEARNING ASSISTANT

2U/TRILOGY EDUCATION SERVICES | MAR 2020 - PRESENT

- Maintaining a 94% student satisfaction rating by facilitating peer code reviews, providing constructive feedback, and demonstrating problem-solving techniques.
- Investigate and complete a root cause analysis for errors by reverse-engineering JavaScript/React code (determining syntax, run time, or logic errors).

### FRONT-END DEVELOPER (CONTRACT)

PIXEL JAR | OCT 2020 - JAN 2021

- Increased mobile traffic by 50% by developing a standardized approach to building responsive, mobile-first sites with Bootstrap.
- Wrote progressive code for expand-and-collapse elements and drop-down menus, ensuring access to content on devices with or without JavaScript support.

### SOFTWARE ENGINEERING TECHNICAL TEACHING ASSISTANT

2U/TRILOGY EDUCATION SERVICES | OCT 2019 - OCT 2020

- Conducting educational sessions for developers as a subject matter expert (SME) in ES6 JavaScript, semantic HTML, and React.js.
- Achieved a 30% increase in overall student satisfaction over 12 weeks by interacting with students daily, answering web-related questions, and removing impediments that delayed their progress to completing projects.

### FULL-STACK PHP DEVELOPER

TURNKEY MARKETING | APR 2019 - MAY 2020

- Oversaw the full lifecycle of software development for the critical internal PHP application. As a result, 9 major product updates were completed on time and within budget.
- Decreased the social media department report gathering hours by over 20% by developing an internal reporting tool written in Vue.js and Bulma

### FRONT-END JAVASCRIPT DEVELOPER

DELUXE BRAND MARKETING | MAY 2018 - OCT 2018

- Improved the overall customer satisfaction of the mission-critical external web app by 50% through revamping UI, UX, and overall design aesthetic.
- Transformed photoshop files into standards-compliant HTML email templates in a Node/AWS environment that has been utilized weekly by over 150 real estate agents.
